VladModels - Anya [aka Oxy] Custom Sets 01-04 (2012) A·Q: Oracle SQL: Having code that does not return any rows How can i do a SQL statement that will run and display no rows? The purpose of my query is to to return the most recent rows in my table and I want to ensure that there are no rows that are older than them that do not have a 'dirtyFlag' set to 1. So far I have come up with this: SELECT MAX(txtTimeStamp) AS txtTimeStamp, MAX(maxValue), MAX(imLoc) FROM DS WHERE txtTimeStamp BETWEEN sysdate - 15 AND sysdate AND ((dirtyFlag = 1 AND st > 0) OR (dirtyFlag = 0) OR (st > 0 AND MAX(cnt) = 0)) GROUP BY txtTimeStamp, imLoc HAVING MAX(txtTimeStamp) but it does not seem to work. The same query returns rows. A: If you want to find only the latest rows without any other rows with the same dirtyFlag value of 1, how about: SELECT * FROM (SELECT ds.*, MAX(txtTimeStamp) OVER (PARTITION BY dirtyFlag) AS maxTimeStamp, MAX(maxValue) OVER (PARTITION BY dirtyFlag) AS maxValue, MAX(imLoc) OVER (PARTITION BY dirtyFlag) AS imLoc FROM DS ds WHERE ds.dirtyFlag = 1) WHERE txtTimeStamp = maxTimeStamp AND maxValue = maxValue AND imLoc = imLoc; Otherwise, to find the latest rows (including ones that have the same dirtyFlag value, so you don't want to group by dirtyFlag - that would give you more than one row
